

## <b>Employee Feedback:</b>

Overall Employee Cyber Hygiene Score: 71.05%

Assessment of Current Security Posture for 'Do you use unique passwords for different accounts (work and personal)?':  
Score: 4

Response 4 indicates a need for improvement.

Identified Weaknesses & Risks:

Minimal risks, but continuous monitoring is recommended.

Recommended Improvements:

1. Maintain current practices and conduct regular audits.
2. Stay updated with the latest cybersecurity trends.
3. Encourage a culture of continuous improvement.

Urgency & Next Steps:

Low Priority: Continue monitoring and improving practices.

Assessment of Current Security Posture for 'Do you store your passwords securely?':

Score: 4

Response 4 indicates a need for improvement.

Identified Weaknesses & Risks:

Minimal risks, but continuous monitoring is recommended.

Recommended Improvements:

1. Maintain current practices and conduct regular audits.
2. Stay updated with the latest cybersecurity trends.
3. Encourage a culture of continuous improvement.

Urgency & Next Steps:

Low Priority: Continue monitoring and improving practices.

Assessment of Current Security Posture for 'Do you use multi-factor authentication (MFA) when available?':

Score: 4

Response 4 indicates a need for improvement.

Identified Weaknesses & Risks:

Minimal risks, but continuous monitoring is recommended.

Recommended Improvements:

1. Maintain current practices and conduct regular audits.
2. Stay updated with the latest cybersecurity trends.
3. Encourage a culture of continuous improvement.

Urgency & Next Steps:

Low Priority: Continue monitoring and improving practices.

Assessment of Current Security Posture for 'Do you lock your computer and devices when leaving them unattended?':

Score: 4

Response 4 indicates a need for improvement.

Identified Weaknesses & Risks:

Minimal risks, but continuous monitoring is recommended.

Recommended Improvements:

1. Maintain current practices and conduct regular audits.
2. Stay updated with the latest cybersecurity trends.
3. Encourage a culture of continuous improvement.

Urgency & Next Steps:

Low Priority: Continue monitoring and improving practices.

Assessment of Current Security Posture for 'Would you recognize a phishing email?':

Score: 4

Response 4 indicates a need for improvement.

Identified Weaknesses & Risks:

Minimal risks, but continuous monitoring is recommended.

Recommended Improvements:

1. Maintain current practices and conduct regular audits.
2. Stay updated with the latest cybersecurity trends.
3. Encourage a culture of continuous improvement.

Urgency & Next Steps:

Low Priority: Continue monitoring and improving practices.

Assessment of Current Security Posture for 'Have you received cybersecurity training on phishing attacks?':

Score: 4

Response 4 indicates a need for improvement.

Identified Weaknesses & Risks:

Minimal risks, but continuous monitoring is recommended.

Recommended Improvements:

1. Maintain current practices and conduct regular audits.
2. Stay updated with the latest cybersecurity trends.
3. Encourage a culture of continuous improvement.

Urgency & Next Steps:

Low Priority: Continue monitoring and improving practices.

Assessment of Current Security Posture for 'Do you verify sender addresses before clicking on links or open

Score: 4

Response 4 indicates a need for improvement.

Identified Weaknesses & Risks:

Minimal risks, but continuous monitoring is recommended.

Recommended Improvements:

1. Maintain current practices and conduct regular audits.
2. Stay updated with the latest cybersecurity trends.
3. Encourage a culture of continuous improvement.

Urgency & Next Steps:

Low Priority: Continue monitoring and improving practices.

Assessment of Current Security Posture for 'Do you report suspicious emails to IT/security?':

Score: 2

Response 2 indicates a need for improvement.

Identified Weaknesses & Risks:

Some risks exist that could be mitigated with better practices.

Recommended Improvements:

1. Review and update access controls regularly.
2. Perform regular vulnerability assessments.
3. Enhance data encryption practices.

Urgency & Next Steps:

Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Do you regularly update your work device (OS, apps, security p

Score: 2

Response 2 indicates a need for improvement.

Identified Weaknesses & Risks:

Some risks exist that could be mitigated with better practices.

Recommended Improvements:

1. Review and update access controls regularly.
2. Perform regular vulnerability assessments.
3. Enhance data encryption practices.

Urgency & Next Steps:

Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Do you use personal USB drives or unauthorized software on work devices?':

Score: 2

Response 2 indicates a need for improvement.

Identified Weaknesses & Risks:

Some risks exist that could be mitigated with better practices.

Recommended Improvements:

1. Review and update access controls regularly.
2. Perform regular vulnerability assessments.
3. Enhance data encryption practices.

Urgency & Next Steps:

Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Do you use encrypted communication channels for sensitive work?':

Score: 2

Response 2 indicates a need for improvement.

Identified Weaknesses & Risks:

Some risks exist that could be mitigated with better practices.

Recommended Improvements:

1. Review and update access controls regularly.
2. Perform regular vulnerability assessments.
3. Enhance data encryption practices.

Urgency & Next Steps:

Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Do you use a VPN or secured connection when working remotely?':

Score: 2

Response 2 indicates a need for improvement.

Identified Weaknesses & Risks:

Some risks exist that could be mitigated with better practices.

Recommended Improvements:

1. Review and update access controls regularly.
2. Perform regular vulnerability assessments.
3. Enhance data encryption practices.

Urgency & Next Steps:

Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Do you avoid using public Wi-Fi for work tasks?':

Score: 2

Response 2 indicates a need for improvement.

Identified Weaknesses & Risks:

Some risks exist that could be mitigated with better practices.

Recommended Improvements:

1. Review and update access controls regularly.
2. Perform regular vulnerability assessments.
3. Enhance data encryption practices.

Urgency & Next Steps:

Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Do you ensure that family members or friends do not use your v

Score: 2

Response 2 indicates a need for improvement.

Identified Weaknesses & Risks:

Some risks exist that could be mitigated with better practices.

Recommended Improvements:

1. Review and update access controls regularly.
2. Perform regular vulnerability assessments.
3. Enhance data encryption practices.

Urgency & Next Steps:

Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Do you know how to report a cybersecurity incident?':

Score: 2

Response 2 indicates a need for improvement.

Identified Weaknesses & Risks:

Some risks exist that could be mitigated with better practices.

Recommended Improvements:

1. Review and update access controls regularly.
2. Perform regular vulnerability assessments.
3. Enhance data encryption practices.

Urgency & Next Steps:

Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Do you feel your organization provides adequate cybersecurity

Score: 2

Response 2 indicates a need for improvement.

Identified Weaknesses & Risks:

Some risks exist that could be mitigated with better practices.

Recommended Improvements:

1. Review and update access controls regularly.
2. Perform regular vulnerability assessments.
3. Enhance data encryption practices.

Urgency & Next Steps:

Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Have you participated in simulated cybersecurity exercises (e.g.

Score: 2

Response 2 indicates a need for improvement.

Identified Weaknesses & Risks:

Some risks exist that could be mitigated with better practices.

Recommended Improvements:

1. Review and update access controls regularly.
2. Perform regular vulnerability assessments.
3. Enhance data encryption practices.

Urgency & Next Steps:

Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Do you think your organization prioritizes cybersecurity?':

Score: 3

Response 3 indicates a need for improvement.

Identified Weaknesses & Risks:

Some risks exist that could be mitigated with better practices.

Recommended Improvements:

1. Review and update access controls regularly.
2. Perform regular vulnerability assessments.
3. Enhance data encryption practices.

Urgency & Next Steps:

Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Would you feel comfortable reporting a mistake or security issue?

Score: 3

Response 3 indicates a need for improvement.

Identified Weaknesses & Risks:

Some risks exist that could be mitigated with better practices.

Recommended Improvements:

1. Review and update access controls regularly.
2. Perform regular vulnerability assessments.
3. Enhance data encryption practices.

Urgency & Next Steps:

Moderate: Address identified risks within the next quarter.
