

# Unified Feedback

## Executive Summary

Thank you for entrusting us with the assessment of your cybersecurity practices. As an SME, you are already navigating the complex landscape of cybersecurity, and your commitment to improving your infrastructure is commendable. With a **Unified Score of 50.51%**, we've identified your strengths and highlighted areas for growth. Our goal is to support you in fortifying your defenses through strategic initiatives.

## Strengths

- **Cohesive Efforts:** Your organizational (44.44%) and employee (56.58%) scores show alignment, indicating that both management and staff are on the same path towards enhancing cybersecurity measures.
- **Foundation in Place:** The existing security framework offers a solid foundation upon which to build more robust practices.

## Areas for Improvement

- **Policy and Practice Gap:** There are discrepancies between established policies and their practical implementation. Bridging this gap is crucial for increased security effectiveness.
- **Communication & Training:** Strengthening these areas ensures that your team is well-informed and equipped to follow best practices consistently.

## Potential Risks

- **Misalignment Risks:** Differences between what is expected and what is practiced increase the potential for security breaches.
- **Inconsistency Across Teams:** Varied security practices may lead to vulnerabilities, particularly where teams interact.

## Action Plan

#### Immediate Actions (0–30 Days)

### 1. Clear Communication:

- Disseminate your cybersecurity policies clearly and accessibly across all levels of your organization. Use simple language to ensure understanding.

### 2. Security Training:

- Mandate completion of targeted cybersecurity training for all employees. Focus on key areas such as phishing awareness and password management.

### **3. Review Access Controls:**

- Conduct an immediate review of your access controls and onboarding processes to ensure only authorized personnel have access to sensitive information.

#### **#### Short-Term Actions (60–90 Days)**

### **1. Workshops for Alignment:**

- Organize interactive workshops that involve cross-functional teams to discuss and bridge the gaps between policies and practice. This encourages a unified approach and engagement in policy adherence.

### **2. Behavior Monitoring:**

- Implement systems to monitor the effectiveness of new practices. This could involve real-time audits or feedback mechanisms that ensure policies are followed and inform further improvements.

## **Conclusion**

We're encouraged by your current efforts and positive alignment between organizational intent and employee action. By addressing the outlined improvement areas and diligently executing the action plan, your SME will stand well-positioned to advance its cybersecurity posture. Please remember that ongoing communication and collaboration are paramount throughout this journey. We are here to support you every step of the way, working alongside you to create a safer digital environment for your organization.

For any questions or further assistance, feel free to reach out. Together, let's fortify your defenses and mitigate risks effectively.
