Employee Feedback

Overall Employee Cyber Hygiene Score: 50.00%

Assessment of Current Security Posture for 'Do you use unique passwords for different accounts (work and personal)?': Score: 2 Response 2 indicates a need for improvement. Identified Weaknesses & Risks: Some risks exist that could be mitigated with better practices. Recommended Improvements: 1. Review and update access controls regularly. 2. Perform regular vulnerability assessments. 3. Enhance data encryption practices. Urgency & Next Steps: Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Do you store your passwords securely?': Score: 2 Response 2 indicates a need for improvement. Identified Weaknesses & Risks: Some risks exist that could be mitigated with better practices. Recommended Improvements: 1. Review and update access controls regularly. 2. Perform regular vulnerability assessments. 3. Enhance data encryption practices. Urgency & Next Steps: Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Do you use multi-factor authentication (MFA) when available?': Score: 2 Response 2 indicates a need for improvement. Identified Weaknesses & Risks: Some risks exist that could be mitigated with better practices. Recommended Improvements: 1. Review and update access controls regularly. 2. Perform regular vulnerability assessments. 3. Enhance data encryption practices. Urgency & Next Steps: Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Do you lock your computer and devices when leaving them unattended?': Score: 2 Response 2 indicates a need for improvement. Identified Weaknesses & Risks: Some risks exist that could be mitigated with better practices. Recommended Improvements: 1. Review and update access controls regularly. 2. Perform regular vulnerability assessments. 3. Enhance data encryption practices. Urgency & Next Steps: Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Would you recognize a phishing email?': Score: 2 Response 2 indicates a need for improvement. Identified Weaknesses & Risks: Some risks exist that could be mitigated with better practices. Recommended Improvements: 1. Review and update access controls regularly. 2. Perform regular vulnerability assessments. 3. Enhance data encryption practices. Urgency & Next Steps: Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Have you received cybersecurity training on phishing attacks?': Score: 2 Response 2 indicates a need for improvement. Identified Weaknesses & Risks: Some risks exist that could be mitigated with better practices. Recommended Improvements: 1. Review and update access controls regularly. 2. Perform regular vulnerability assessments. 3. Enhance data encryption practices. Urgency & Next Steps: Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Do you verify sender addresses before clicking on links or opening attachments?': Score: 2 Response 2 indicates a need for improvement. Identified Weaknesses & Risks: Some risks exist that could be mitigated with better practices. Recommended Improvements: 1. Review and update access controls regularly. 2. Perform regular vulnerability assessments. 3. Enhance data encryption practices. Urgency & Next Steps: Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Do you report suspicious emails to IT/security?': Score: 2 Response 2 indicates a need for improvement. Identified Weaknesses & Risks: Some risks exist that could be mitigated with better practices. Recommended Improvements: 1. Review and update access controls regularly. 2. Perform regular vulnerability assessments. 3. Enhance data encryption practices. Urgency & Next Steps: Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Do you regularly update your work device (OS, apps, security patches)?': Score: 2 Response 2 indicates a need for improvement. Identified Weaknesses & Risks: Some risks exist that could

be mitigated with better practices. Recommended Improvements: 1. Review and update access controls regularly. 2. Perform regular vulnerability assessments. 3. Enhance data encryption practices. Urgency & Next Steps: Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Do you use personal USB drives or unauthorized software on work devices?': Score: 2 Response 2 indicates a need for improvement. Identified Weaknesses & Risks: Some risks exist that could be mitigated with better practices. Recommended Improvements: 1. Review and update access controls regularly. 2. Perform regular vulnerability assessments. 3. Enhance data encryption practices. Urgency & Next Steps: Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Do you use encrypted communication channels for sensitive work discussions?': Score: 2 Response 2 indicates a need for improvement. Identified Weaknesses & Risks: Some risks exist that could be mitigated with better practices. Recommended Improvements: 1. Review and update access controls regularly. 2. Perform regular vulnerability assessments. 3. Enhance data encryption practices. Urgency & Next Steps: Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Do you use a VPN or secured connection when working remotely?': Score: 2 Response 2 indicates a need for improvement. Identified Weaknesses & Risks: Some risks exist that could be mitigated with better practices. Recommended Improvements: 1. Review and update access controls regularly. 2. Perform regular vulnerability assessments. 3. Enhance data encryption practices. Urgency & Next Steps: Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Do you avoid using public Wi-Fi for work tasks?': Score: 2 Response 2 indicates a need for improvement. Identified Weaknesses & Risks: Some risks exist that could be mitigated with better practices. Recommended Improvements: 1. Review and update access controls regularly. 2. Perform regular vulnerability assessments. 3. Enhance data encryption practices. Urgency & Next Steps: Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Do you ensure that family members or friends do not use your work devices?': Score: 2 Response 2 indicates a need for improvement. Identified Weaknesses & Risks: Some risks exist that could be mitigated with better practices. Recommended Improvements: 1. Review and update access controls regularly. 2. Perform regular vulnerability assessments. 3. Enhance data encryption practices. Urgency & Next Steps: Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Do you know how to report a cybersecurity incident?': Score: 2 Response 2 indicates a need for improvement. Identified Weaknesses & Risks: Some risks exist that could be mitigated with better practices. Recommended Improvements: 1. Review and update access controls regularly. 2. Perform regular vulnerability assessments. 3. Enhance data encryption practices. Urgency & Next Steps: Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Do you feel your organization provides adequate cybersecurity training?': Score: 2 Response 2 indicates a need for improvement. Identified Weaknesses & Risks: Some risks exist that could be mitigated with better practices. Recommended Improvements: 1. Review and update access controls regularly. 2. Perform regular vulnerability assessments. 3. Enhance data encryption practices. Urgency & Next Steps: Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Have you participated in simulated cybersecurity exercises (e.g., phishing tests)?': Score: 2 Response 2 indicates a need for improvement. Identified Weaknesses & Risks: Some risks exist that could be mitigated with better practices. Recommended Improvements: 1. Review and update access controls regularly. 2. Perform regular vulnerability assessments. 3. Enhance data encryption practices. Urgency & Next Steps: Moderate: Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Do you think your organization prioritizes cybersecurity?': Score: 2 Response 2 indicates a need for improvement. Identified Weaknesses & Risks: Some risks exist that could be mitigated with better practices. Recommended Improvements: 1. Review and update access controls regularly. 2. Perform regular vulnerability assessments. 3. Enhance data encryption practices. Urgency & Next Steps: Moderate:

Address identified risks within the next quarter.

Assessment of Current Security Posture for 'Would you feel comfortable reporting a mistake or security issue to IT/security?': Score: 2 Response 2 indicates a need for improvement. Identified Weaknesses & Risks: Some risks exist that could be mitigated with better practices. Recommended Improvements: 1. Review and update access controls regularly. 2. Perform regular vulnerability assessments. 3. Enhance data encryption practices. Urgency & Next Steps: Moderate: Address identified risks within the next quarter.
